

Noggin for Security

Security Solution Module

Manage every aspect of protective security in the world's leading integrated safety and security platform. Noggin Security is a security management system that provides you all the information and tools that you need to effectively manage all security incidents, threats and operations, enabling you to reduce risks and incidents and make your people and assets more secure.

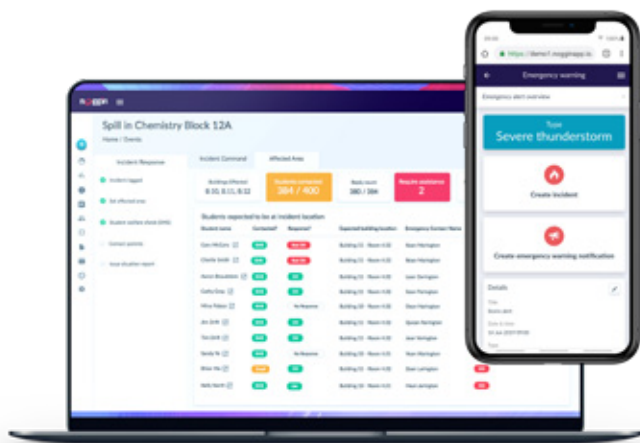

Use Noggin Security to:

- Report and manage all security incidents, major events, risks and operations in a single flexible platform.
- Task and dispatch security staff to respond to any event.
- Conduct facility and event risk and threat assessments, and track security controls and risk mitigation actions.
- Initiate and track investigations, persons of interest, capture evidence and logs, related actions, and follow best-practice standard methodologies.
- Manage security assurance activities such as alarm tests, door checks, audits and inspections.
- Easily capture rich logs for patrols, shift-changes, parking infringements, lost and found property, security escorts and other security activities
- Track and manage all your security information, key documents, tasks, checklists, and actions in one place
- Visualise locations of incidents, risks, people, and assets using the fully integrated mapping features.
- Increase team collaboration and efficiency using the in-built communications for email, SMS, or app notifications, broadcasts, alerts, and reminders.
- Manage key details of staff, contractors, victims, witnesses, external parties, and persons of interest
- Easily relate incidents, risks, and threats to your own organisation structure, buildings, sites, vehicles and other assets.
- Display key information where it is needed using flexible dashboards, analytics, and reporting that caters for all your stakeholders.
- Automate and lead people through your procedures, with fully-configurable workflows.

Key Features:

- Incident reporting and management for security events, planned and unplanned
- Situational awareness dashboards for monitoring your operations, facilities, and people
- Workspace dashboards for security managers, supervisors, dispatchers and patrol officers
- Investigations including ICAM and 5 Whys, case notes, and persons of interest
- Alarm tests, duress alarms, lost & found property, patrol and shift logging
- Situation and damage reports
- Contractor and compliance management
- Risk and threat assessments, treatment, and reporting
- Door and window checks, security inspections and audits
